CLEARANCES.

Rule 83-A will not apply at stations not telegraph office, or where offices are closed for the day.

Trains get clearances as follows:

All at Colton and Beaumont.

All westward (except first class) at Patio and not at Yuma.

All westward first class at Yuma.

Nos. 35, 38 at Imperial Junction.

All branch trains at Calexico, Imperial Junction, Redlands Junction, Redlands, San Bernardino, Whittier, West Anaheim, Newport Beach, Los Alamitos, San Pedro, Duarte, Burbank, Chatsworth, Nordhoff, Montalvo, Saugus, when telegrapher on duty.

REGISTER EXCEPTIONS.

Nos. 10, 75, 76, 101, register by Form 2642 at River Station and Burbank.

Only trains terminating register at Oxnard and San Fernando.

Only trains to and from Branch and terminating register **at Ventura Junc., Montalvo, Shorb, Bassett,** Pomona, Ontario, Redlands Junc., Imperial Junc.

No. 22 register at Montalvo.

Nos. 25, 26, 49, 102 register by Form 2642 River Station, Burbank and **Saugus.**

Nos. 2, 4 and 102 register by Form 2642 at Beaumont.

"At Registering stations on single track, or at the end of double track when passing from single to double track, where trains are permitted to register, as per Rule 83-B, conductors and telegraphers, or telephone operators, must comply with Rule 96, the same as at non-registering stations."

TRAIN AND AIR INSPECTION.

No Freight Train may make a run of more than 40 miles without a stop being made for inspection of train.

Air brakes of all trains must be tested from rear of train at Beaumont, eastward trains at Colton, westward trains at Palm Springs.

Eastward freight trains stop at Cabazon, Palm Springs, Edom, and westward freight trains at El Casco, Redlands Junction 5 minutes or more where trainmen will make careful examination of wheels under all cars.

Conductor will report to Superintendent, by wire, any failure to properly control train by air brakes and will deliver to Car Inspector at first terminal, list showing tonnage of each car in train. Car Inspector will add to list the piston travel of each car in train, as shown by test made before road engine is cut off, also result of three-minute test of all retainers. The list will then be forwarded to Superintendent by first mail.

"19" ORDER.

Within the automatic block signal limits between Saugus and Indio—Santa Barbara and Burbank—Imperial Junction and Yuma, the note under Rule 211 is modified as follows:

Form "19" train order may be issued to restrict the superiority of a train, except that Form 31 must be used (1) when orders are delivered at a non-telegraph or closed telegraph station. (See Rule 217.) (2) When necessary to restrict a train which has been cleared or the engine of which has passed train order signal. (See Rule 219.) (3) When issuing an order Form "G," example 3. (4) When giving any train right over all trains. (5) When reducing a time order where necessary that dispatcher have signature of superior trains before completing order to an inferior train.

Operator will fill out clearance, designating thereon numbers of all orders, (Forms 19 and 31), repeat to Dispatcher train and order numbers as they appear on clearance and obtain O. K. with time and Superintendent's initials, writing same before delivery in blank space following: "Signal is out for." Operator will retain carbon copy of clearance.

Dispatcher must write train and order numbers in his train order book as transmitted by operator from clearance, and must designate time clearance was made O. K., not transmitting O. K. unless operator repeats numbers of all orders to be delivered to the train to which clearance is addressed.

When "19" order restricting superiority is issued at station where superiority is restricted, train must be stopped by operator before delivery of order.

Conductor's and Engineer's attention is called to the importance of approaching at a moderate rate of speed telegraph offices where orders are to be received. Also to the necessity of carefully checking clearance to ascertain positively that clearance is properly addressed and that orders received are those called for by clearance.

Clearance outside automatic block signal limits must show numbers of all orders (both 31 and 19) and be O. K.'d by Dispatcher same as within block signal limits.

AUTOMATIC SIGNALS.

Automatic block signals are in operation between Santa Barbara and Burbank, Saugus and River Station, River Station and Naud Junction, Naud Junction and Mission Junction, on westward track only, River Station and Mission Junction, Los Angeles Shop and East yard limit Indio, on Covina Branch one mile west of Pomona, between Yuma and Imperial Junction.

Trains stopped by automatic block signal (not minute block) **will be governed by rule 504. When flagman has started ahead, wait 5 minutes before proceeding.**

Overlaps are located at Shorb, Alhambra, San Gabriel, Savanna and are indicated by boards reading "In holding main track for meets eastward trains must not pass this post."

The tower signals on eastward and westward tracks at Tropico tower are semi-automatic and are held at stop by an open switch or train on main line in the same manner as automatic signals. These signals are held at stop regardless of towerman's efforts if main track is occupied or a switch is open.

Distant switch signals are operated at east and west end Piru, east end Camulos and east of East switch at Castaic and on Covina branch at Bassett. These signals will be set at "caution" by an open switch or a train on main track between signal and switch or by a train foul of Main Track.

Automatic block signals—3985 at Ventura—4026 at Montalvo—4614, 4621 at San Fernando—4500, 4513 at Saugus, 5145 at Pomona, 5396, 5399 at Colton, 5440 at Redlands Junction for trains going to Redlands Branch—6100, 6115, 6116, 6121 at Indio, 6668, 6672, 6673, 6676, 6677, 6681 at Imperial Junction, governing movement of trains entering yards will be minute blocks. If signals are to stop, wait one minute then proceed under control, not exceeding 6 miles per hour.

At night if light not burning trains will be governed by position of arm.

Signal failures or irregularities either action of arm or condition of light will be reported to Chief Dispatcher from first open telegraph office. He will notify Signal Supervisor and Maintainer.

On Single Track in Block Signal limit Rule 86 is modified as follows: An inferior train will clear the time of superior train in the same direction not less than ten (10) minutes.

Automatic signals on siding Beaumont between East wye switch and east end siding at Apex. Short arm on signal 5629 governs trains entering siding. If arm does not clear when switch thrown train may proceed under flag.

INTERLOCKING TOWERS.

For any movement against traffic sound one long and one short blast. When train, which has been given semaphore signal at any crossing, does not wish to use crossing, one short followed by one long blast of whistle should be sounded for the information of towerman.

Speed limit of first class trains, between outside switches of yards as follows:

Santa Barbara	15 miles per hour
Los Angeles	12 “ “ “
Colton	12 “ “ “
Indio	12 “ “ “

Speed of trains restricted by ordinance through city limits:

Santa Paula	15 miles per hour
Ventura	10 “ “ “
Los Angeles	12 “ “ “
Pomona	15 “ “ “
Ontario	15 “ “ “
Colton	15 “ “ “

Trains not exceed:—

20 miles per hour between slow-boards, Harper to Newport Beach.
15 miles per hour through Inter-locking limits, Shorb.
20 miles per hour over San Pedro drawbridge.

No train exceed 20 miles per hour over any railroad, motor or electric crossing except; P. E. crossing Bloomington 15 miles per hour and westward passenger trains not restricted over crossing P. E. Ry. 0.2 mile east of Tropico.

Eight, ten-wheel and Mogul engines, running light, may make passenger train speed per special rule.

Light engines backing and trains handled by engines backing not exceed 25 miles per hour, on main line; and 20 miles per hour on Branches.

Switch engines running light not exceed 20 miles per hour.

San Fernando helpers 2900 class and consolidation engines not exceed 35 miles per hour, and when running light, speed restrictions of freight trains over districts as listed will not be exceeded, except betwewen Colton and Indio speed of 35 miles per hour permitted.

Mallet engines not exceed 25 miles per hour.

Trains meeting on double track not exceed 20 miles per hour while passing.

Trains handling steam wrecker not exceed 15 miles per hour on branches and 25 miles per hour on main line unless otherwise instructed.

The following speed restrictions on branches will govern handling large oil cars:

Long Beach, Smeltzer, Los Alamitos and Duarte branches	12 miles per hour.
Nordhoff, Whittier, Newport Beach and Crafton branches	15 “ “ “
Between Florence and Santa Ana	20 “ “ “
Between Declez and Declezville	10 “ “ “

When ground is soft speed should be restricted to 10 miles per hour or less.

USE OF RETAINERS.

On passenger trains descending grade between Redlands Junction and Palm Springs one-half retainers will be turned up on all cars to which trainmen have access, and after proceeding two miles remaining retainers will be turned up and those first turned up will then be turned down—such alternation to continue every two miles until arrival Palm Springs or Redlands Junction.

On freight trains descending grade between Colton and Edom all retainers will be used.

Conductors will be held responsible for proper handling of retainers by brakemen.

In addition, on freight trains, retainers will be used on grades in accordance with Rules 46, 47, 48 governing air brakes—"red book" effective July 1, 1909.

Retainers will be used on other trains and under other conditions where in the judgment of the engine and train crew it is deemed necessary.

Where retainers are used the rate of speed of freight trains on any grade over one per cent. will not exceed 25 miles per hour, and on grades of this character more than 5 miles long, for the first 5 miles the time consumed in traveling any one mile shall not be less than 3 minutes. The above maximum speed restriction will not affect the speed on heavy grades or other locations where the maximum is now provided.

Trains designated in orders as light extras take siding for opposing extras.

It will not be permissible to run any engine larger than 1600 class Mogul over the steel bridge No. 491-C and the wooden Howe truss bridge No. 497-D on the Santa Ana Branch, nor will it be permissible to run two engines coupled over the above bridges.

Headlight and marker lights must be displayed while passing through Tunnels 25 and 26.

Engines of freight trains must cut off to take water when more than 20 cars.

The maximum tonnage rating per operative brake of 110Ms between Colton and Palm Springs must be strictly observed.

When in an engineer's judgment, track which is protected by slow order is safe for higher rate of speed than allowed by slow order, engineer will notify conductor, stating speed he considers safe, conductor will send message to Superintendent from first open telegraph office giving information.

Trains entering Arcade Station will not pass Fourth Street until receive signal switch tender.
